

What is GLP-X?

GLP-X™ is a premium supplement crafted from naturally sourced ingredients that have been clinically studied to increase GLP-1 production. Three focused blends—the Appetite Support blend, the Water Balance blend, and the Carb Management blend—work non-stop to regulate hunger, combat bloat, and maintain healthy blood sugar levels, enabling the long-term success you've been looking for! With GLP-X, it's not just about managing weight—it's about elevating your results.*

Benefits and Features

- Supports production of GLP-1*
- Combats cravings and excess water retention*
- Helps maintain healthy blood sugar levels in already healthy individuals*

Key Ingredients

- Eriomin™
- Berberine
- Juniper berry
- Green coffee bean extract

Directions

Take two capsules daily, one in the morning and one at night, at least 30 minutes before a meal. We strongly recommend that you take GLP-X for at least 12 weeks (3 months) to see optimal results.

FAQ

Question: Can I take GLP-X with other Xyngular products?

Answer: We recommend pairing GLP-X with your favorite Xyngular products according to your desired benefits, such as weight management, gut health, or controlling sugar cravings. Combining products will help you achieve better results.

Question: What makes GLP-X different from other weight loss products?

Answer: This powerful formula features three unique blends to support your success.

- **Carb Management Blend:** Supports healthy GLP-1 levels to maintain healthy blood sugar levels in healthy individuals*
- **Water Balance Blend:** Reduces excess fluid retention to address bloating and hormonal fluctuations*
- **Appetite Support:** Fights sugar cravings and promotes prolonged feelings of fullness*

FAQ

Question: Where is GLP-X made?

Answer: GLP-X is manufactured in the United States in a CGMP (Current Good Manufacturing Practices), FDA-compliant facility.

Question: Can I take GLP-X with Cheat?

Answer: Before the launch of GLP-X, we did not recommend taking Cheat with any medications or vitamins due to the potential of glucomannan to affect nutrient absorption; however, when taking Cheat with GLP-X, both products actually provide similar appetite control benefits. Drink plenty of water when using both products to aid absorption, or take GLP-X 15 minutes before Cheat.

Question: How much caffeine is in GLP-X, and what is the source?

Answer: GLP-X has a maximum amount of 1.4 mg of caffeine per capsule from green coffee extract. Green coffee extract is a concentrated source of chlorogenic acid that provides antioxidants and helps inhibit carbohydrate absorption.

Question: What are the chemical ingredients (non-natural)?

Answer: The combination of these ingredients provides a comprehensive approach to support overall health, including metabolic function, cardiovascular health, mood regulation, and bone strength.

Ammonium chloride: Aids in maintaining electrolyte balance and supporting kidney function.

Chromium picolinate: Helps regulate blood sugar levels and may enhance insulin sensitivity.

Magnesium oxide: Contributes to muscle and nerve function and bone health.

Phytosterols: Assist in lowering cholesterol levels and supporting heart health.

Question: Why is ammonium chloride included in GLP-X?

Answer: Ammonium chloride is included in GLP-X primarily for its potential to promote a healthy pH balance and support kidney function by aiding in the excretion of excess waste products through urine. It may also assist in maintaining electrolyte balance in the body.

Question: Does it contain bitter orange/citrus aurantium?

Answer: No, the formula does not include bitter orange/citrus aurantium.

Question: Where can I access the clinical trials related to GLP-X?

Answer: Clinical trials were done for the ingredient Eriomin, not the GLP-X formula, and anyone can access them via the Internet.

Question: Could I keep taking this product even after reaching my goal weight, or is it intended for discontinuation at that point?

Answer: Yes, you can continue taking the product even after achieving your weight goals. Beyond weight management, the product offers additional wellness benefits that will support you on your wellness journey.

Question: What is the berberine dosage?

Answer: The berberine dosage is part of the proprietary GLP-X Carb Management Blend. Between Eriomin and berberine, our formulation contains about 250 mg of berberine (about the weight of ten grains of rice).

Question: Can GLP-X be taken by someone taking Ozempic or Mounjaro shots?

Answer: Please consult with your doctor if you are using any shots or medication targeting GLP-1 production.

Question: Is the GLP-X formula vegan-friendly?

Answer: Yes. The capsules are made of hypromellose, a form of vegetable cellulose.

Question: Is GLP-X gluten-free?

Answer: Yes.
